## Survival Fire Distiller – Non-Electric Steam Water Distiller

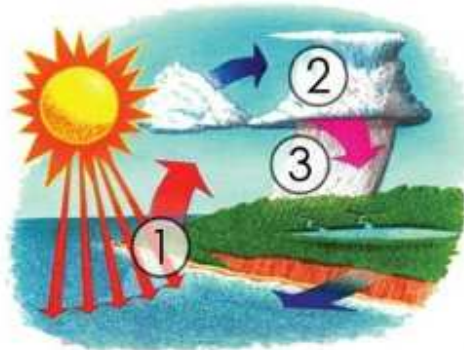

*Now From WaterDistillers.com*

Emergency survival situations require special attention. Our brand new survival non-electric, life-saving, Survival Still steam fire distiller is the clear choice designed for emergencies, survivalists, natural and man-made catastrophes, infrastructure failures, power outages, camping, travel, peace-of-mind, and is a primary or back up water distiller system...

This Non-Electric Fire Survival Still Fire Distiller turns any water into sterile, distilled high-purity water.

The Survival Fire Distiller is a heavy-duty stainless steel non-electric water distiller that purifies water by boiling the water and collecting only the pure steam (a process called distillation). The result; distilled pure water from any source. If you're in an emergency, you can purify water from a pond, a stream, mud hole, or even the ocean for an indefinite period of time.

The process of distillation is recommended by FEMA, the American Red Cross and the AWWA for purifying water during an emergency situation.
